Recovery of gold from secondary sources – A review

This paper presents an overview of the various methodologies used in the recovery of gold from secondary sources. Gold recovery is interesting due to its vast industrial applications, high market prices, and extensively used precious metal. The sanctuary value attributed to gold during international political and economical crises and the limited resource of this metal may explain the recent

Properties of water Wikipedia

Water (H₂O) is a polar inorganic compound that is at room temperature a tasteless and odorless liquid which is nearly colorless, apart from an inherent hint of blue. It is by far the most studied chemical compound and is described as the universal solvent and the solvent of life. It is the most abundant substance on Earth and the only common substance to exist as a solid, liquid, and gas.

Senior Chemistry Extended Experimental Investigations

THE DEPENDENT VARIABLE MEASURING THE ALCOHOL CONCENTRATION IN WINE. The most common method is by redox titration. In this analysis, you add an excess of standardized acidified potassium dichromate solution to the wine, which converts the ethanol to ethanoic (acetic) acid.
