4.8.16 In the first call to the function, we only define the argument `a`, which is a mandatory positional argument. In the second call, we define `a` and `n` in the order they are defined in the function. Finally, in the third call, we define `a` as a positional argument and `n` as a keyword argument. If all of the arguments are optional, we can even call the function with no arguments.
