History of algebra Wikipedia

Algebra can essentially be considered as doing computations similar to those of arithmetic but with non numerical mathematical objects However until the 19th century algebra consisted essentially of the theory of equations For example the fundamental theorem of algebra belongs to the theory of equations and is not nowadays considered as belonging to algebra in fact every proof must use

Prime number Wikipedia

A prime number or a prime is a natural number greater than 1 that cannot be formed by multiplying two smaller natural numbers A natural number greater than 1 that is not prime is called a composite number For example 5 is prime because the only ways of writing it as a product 1×5 or 5×1 involve 5 itself However 6 is composite because it is the product of two numbers 2×3 that
