Concrete material science Past present and future

There is a wide consensus that the exceptional recent growth of cement and concrete consumption on the global scale is due to a handful of actors only among the emerging countries China in particular 1 2 But there are also good reasons to consider that the reason for this lasting growth resides in the current converging needs in developed and developing countries

Optical fiber Wikipedia

An optical fiber is a flexible transparent fiber made by drawing glass or plastic to a diameter slightly thicker than that of a human hair Optical fibers are used most often as a means to transmit light between the two ends of the fiber and find wide usage in fiber optic communications where they permit transmission over longer distances and at higher bandwidths data rates than electrical

Man Made Global Warming Disproved Â« JoNova

The direct effect of CO₂ is only 1.2C The IPCC estimates that carbon dioxideâ€™s direct effect is 1.2 Â°C 1

of warming that is before feedbacks are taken into account for each doubling of the carbon dioxide level Models amplify that warming with assumptions about positive feedback see the blue region of model estimates in the graph below But observations show that net feedback is
