## **International Space Station Wikipedia**

The International Space Station ISS is a space station or a habitable artificial satellite in low Earth orbit Its first component was launched into orbit in 1998 with the first long term residents arriving in November 2000 It has been inhabited continuously since that date The last pressurised module was fitted in 2011 and an experimental inflatable space habitat was added in 2016

## **Infrastructure Atomic Rockets**

As the delta V for a mission goes up the amount of propellant required goes up exponentially or looking at it another way the amount of payload shrinks exponentially Large amounts of propellant are expensive but the higher the mass ratio the higher the likelihood that the spacecraft will not be reusable

## **Astromilitary Atomic Rockets**

Of those American vessels near the Argonne when first contact was made with the enemy only the Washington was sufficiently massive to go out in a blast of yonder size and shape If that was the case Captain Martin Diaz of the United States Astromilitary Corps was a dead man The other ships of the line were too distant traveling on vectors too unlike his own for their scout boats to come

## **Browse All Topics The National Academies Press**
