Spacetime Wikipedia

In physics spacetime is any mathematical model that fuses the three dimensions of space and the one
dimension of time into a single four dimensional continuum Spacetime diagrams can be used to visualize
relativistic effects such as why different observers perceive where and when events occur Until the turn of the
20th century the assumption had been that the three dimensional geometry of

Time Wikipedia

Time is the indefinite continued progress of existence and events that occur in apparently irreversible
succession from the past through the present to the future Time is a component quantity of various
measurements used to sequence events to compare the duration of events or the intervals between them and to
quantify rates of change of quantities in material reality or in the conscious
